

VISHAL KUMAR

Cybersecurity Trainer | Penetration Tester | Web & API Security

+91 88264 62627 vishalkumar280404@gmail.com LinkedIn GitHub TryHackMe Delhi, India

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in **VAPT, Web/API Security, and Cybersecurity Training**. Experienced in production application security testing, vulnerability discovery, exploitation validation, PoC development, and professional security reporting. Also experienced in delivering practical training across **IT fundamentals, Linux, Windows, Networking, Python, Ethical Hacking, Penetration Testing, Web Security, and SOC L1**.

PROFESSIONAL EXPERIENCE

Boltmartz IT Solutions

Penetration Tester

Jan 2026 – Present

Indore, India

- Conducted gray-box VAPT on a production multi-tenant SaaS platform, identifying **114 vulnerabilities including 34 CVSS 10.0 Critical findings**.
- Performed security testing across authentication, authorization, APIs, business logic, web applications, cloud integrations, and multi-tenant isolation.
- Identified high-impact vulnerabilities including **BOLA/IDOR, privilege escalation, SSRF, authentication bypass, stored/DOM XSS, CORS, Host Header attacks, password-reset poisoning, and credential exposure**.
- Discovered a **system-wide BOLA attack chain across 34 API endpoints**, demonstrating cross-tenant access to sensitive information and unauthorized actions.
- Identified a complete **privilege escalation path from Tenant Admin to Platform Super-Admin** through chained authorization and account-management weaknesses.
- Chained **SSRF to AWS IMDSv1**, resulting in exposure of cloud credentials; also identified application secrets and AWS credentials exposed through debug responses.
- Identified **Host Header / Password Reset Poisoning**, arbitrary-origin CORS with credentials, and multiple Stored/DOM-Based XSS vulnerabilities.
- Prepared enterprise-grade VAPT reports containing **PoCs, attack-chain analysis, CVSS v4.0 scores, CWE classifications, MITRE ATT&CK mapping, business impact, and remediation recommendations**.
- Automated reconnaissance and repetitive security-testing workflows using **Python and Bash**, reducing manual effort by approximately 40%.

CYBERSECURITY TRAINING EXPERIENCE

Cybersecurity Trainer / Instructor

College & Professional Training

~July 2025 - Present

India

- Delivered structured cybersecurity training starting from **IT and Computer Fundamentals** and progressing toward practical Offensive and Defensive Security.
- Taught **Linux fundamentals, Windows administration and security, Networking, TCP/IP, protocols, system fundamentals, and Python scripting**.
- Delivered practical **Ethical Hacking and CEH-level training**, covering reconnaissance, scanning, enumeration, vulnerability assessment, exploitation concepts, and security testing methodology.
- Trained students in **Advanced Penetration Testing and Web Application Security**, including authentication, authorization, API security, common OWASP vulnerabilities, testing methodology, and practical lab exercises.
- Conducted **SOC L1 training** covering SIEM fundamentals, log analysis, alert investigation, threat detection, incident response, and security monitoring.
- Designed and conducted hands-on labs, demonstrations, troubleshooting sessions, and practical exercises to connect cybersecurity theory with real-world workflows.

TECHNICAL SKILLS

Offensive Security: VAPT, Web Application Pentesting, API Security, OWASP Top 10, BOLA/IDOR, SSRF, XSS, Authentication Bypass, Privilege Escalation, Business Logic Testing, JWT Security, CORS, Host Header Attacks

Security Tools: Burp Suite Pro, Nmap, SQLMap, Gobuster, Metasploit, Wireshark, Netcat, Hydra, Shodan, TheHarvester, Maltego

Systems & Networking: Linux, Windows, TCP/IP, HTTP/HTTPS, DNS, Network Security, System Administration, Security Fundamentals

Programming & Automation: Python, Bash/Shell, C++, SQL, Security Automation, Reconnaissance Automation

Defensive Security: SOC L1, SIEM Fundamentals, Log Analysis, Alert Investigation, Threat Detection, Incident Response, Security Monitoring

Reporting & Frameworks: CVSS v4.0, CWE, MITRE ATT&CK, OWASP, SOC 2, ISO 27001, GDPR, PCI DSS

EDUCATION

J.C. Bose University of Science & Technology, YMCA

B.Tech in Computer Science Engineering | **CGPA: 7.4/10**

2026

Delhi, India
